Section 1008.30 (formerly 240.117), Florida Statutes, requires the State Board of Education to develop and implement a common placement testing program to assess the basic computation and communication skills of students who intend to enter a degree program at any public community college or state university.

Every year the State provides reports to districts and high schools on their graduates' performance on these entry-level placement tests administered at Florida public community colleges and state universities. All entering freshmen must demonstrate certain basic skills before beginning college-level courses. Students who meet minimum standards on the elementary Algebra, Reading Comprehension, and Sentence Skills portions of the Florida College Placement Test (CPT) are considered 'ready' for college-level math, reading, and writing, respectively. Students may be exempted from these tests if they score high enough on the SAT or ACT. Students who test below the cutoff score for an area are required to enroll in remedial coursework.

The students represented in this report are not a random sample of all Florida high school graduates nor a random sample of all M-DCPS graduates. This report focuses on the test results for students who:

- graduated during the 2003-04, 2004-05, 2005-06, and 2006-07 school year with a standard diploma
- entered a Florida public university or community college as degree-seeking students

These students represent roughly half of the 2004-07 graduates in Florida and a little more than half of the M-DCPS graduates. The report does not include: graduates who do not go to college, graduates who attend private or out-of-state colleges, transfer students, casual or non-degree-seeking students, students who take time off between high school and college, GED or non-standard diploma recipients or private high school graduates.

The compendium is organized by M-DCPS senior high schools and includes the number of students tested as well as the percent of students scoring above the established criteria or cutoff established by Section 1008.30, Florida Statutes. These data are provided for four groups of students including: 1) Black, non-Hispanic; 2) White, non-Hispanic; 3) Hispanic; and 4) all students combined including students of other racial/ethnic groups. District and State figures are included on the first two pages of the compendium.

Please note beginning with the CPT results for 2004 graduates, the students' best test scores rather than the first test scores have been provided by the state. This revision should be considered when comparing year to year performance. The state maintains this change provides a more accurate representation of college readiness since it is this score that is used when making academic decisions about students.

During the four years covered by this report, the college readiness of M-DCPS students has improved. Approximately three percent more students districtwide passed all three areas in 2007 than had done so in 2004 (i.e., 53.5% vs. 50.5%). The greatest improvement was seen in Reading (72.0% passed in 2007 compared to 68.9% in 2004). Hispanic students improved their rate of passing all three areas most with 54.6% doing so in 2007 compared to only 50.5% in 2004. Hispanic students made the most significant improvement in a single academic area considering 58.8% had passed Mathematics in 2004 compared to 62.7% in 2007. This constituted a 3.9 percentage point gain.

Although the percentage of Black students passing all three areas improved from 2004 to 2007 (i.e., 36.3% to 38.5%) they still remained the group least prepared for college-level courses. In 2007, approximately 3 out of 5 Black students tested into remedial courses as a result of their performance in at least one academic area.

The present compendium has been completed to assist M-DCPS high schools in preparation of students for college. These results can be used by high schools to determine the extent to which graduates are prepared for college-level courses.

A series of five graphs follow and have been provided in this year's report to further illustrate trends concerning the college readiness of M-DCPS graduates.

Please note that blank cells in the subsequent tables indicate either missing data from the state's CPT website or there were no students tested in certain ethnic/racial categories for the given year. For additional information, the interested reader is referred to the Florida Department of Education website at <http://data.fldoe.org/perfCPT/>.

All reports distributed by Research Services can be accessed at <http://drs.dadeschools.net>.
